Eye Cream with Eyeseryl® Yeast, Gorgonian Extract®, Argiriline, & Colhibin Peptides

PRODUCT PROFILE: Baggy eyes (dermatochalasis) are a result of inflammation and fluid collection in the sub orbital skin. This eye cream specifically treats the inflammatory cause of dermatochalasis with the newest cosmeceutical ingredients such as: anti-inflammatory pseudopterosins found in reef dwelling sea whip (Pseudopteroergo elisabethae). These are the most potent anti-inflammatory compounds ever discovered. Another new bio-active peptide, Eyeseryl® blocks the cytokines which direct the collection of fluid(edema) around the eye, and Argiriline and Colhibin reverse wrinkle formation..

PRODUCT BENEFITS: For Maximum Eye Treatment this cream combines new technology with the best conventional therapeutic agents to provide benefits:

1. Topical Anti inflammatory effects are useful in the treatment edema, and irritation, as found in Rosacea.. Argiriline(Acetylhexapeptide-3) is intended to fight wrinkling
2. Bisabolol, the soothing component in Chamomile, with Yeast Extract and Placental Enzymes are three classical materials for reducing the appearance of aging.
3. Glycerin and emollient Squalane help maintain the epidermal barrier.
4. Eyeseryl®(Acetyl tetrapeptide-5) has been proven to help fight cause of edema.

PACKAGING: This expensive but highly effective formula may be packaged in glass or plastic (HDPE, PVC, Polypro, or PETE) It is compatible with most treatment pumps, and does not require stainless steel spring and ball parts for compatibility.

INGREDIENTS:

Sea Whip (Pseudopteroergia E.) Extract, Yeast (Sacchromyces M.) Extract, Deionized Water, Mineral Oil, Decyl Oleate, Cetyl Alcohol, Squalane, Glycerin, Glyceryl Stearate, PEG-40 Stearate, Rice (OryzaSativa) Peptides, Acetylhexapeptide-3, Caprylic/Capric Triglyceride, AcetylTetrapeptide-5, Silica, Placental Enzymes, Bisabolol, PEG-100 Stearate, Dimethicone, Tocopheryl Acetate(Vitamin E), Phenoxyethanol, Methylparaben, Propylparabrn, PEG 75M, Disodium EDTA .
